# CRITICAL CARE UNIT

DEPARTMENT OF PAEDIATRICS & NEONATOLOGY

# Paediatrics & Neonatology

The department comprises well-experienced, qualified doctors and nurses who provide comprehensive services for the entire range of paediatric and neonatology requirements. The services include all kinds of medical, surgical, therapeutic, and diagnostic treatments, ensuring the well-being of your child. The department features well-equipped facilities such as the Well Baby Nursery, Paediatric Ward, NICU, SCBU, and PICU, with round-the-clock availability of neonatologists and paediatricians to care for your child.

In addition to paediatric specialists and trained nurses, the entire department is equipped with advanced technologies to provide treatment and care for neonates and children alike. The department has round-the-clock coverage by registrars, senior paediatricians and paramedical staff with extensive experience to handle any high-risk cases.

## Critical Care Unit

When your newborn baby is premature or ill you naturally seek the best possible care for your child. We understand that admitting your child to a Critical Care Unit can be an incredibly stressful time for your family. Our department's Critical Care Unit is a super-specialised facility dedicated to neonates and children who require intensive monitoring and medical care. Equipped with advanced technology, our facility ensures the safety and well-being of your child. Our skilled nurses are present 24/7 ensuring that the entire critical care team can respond efficiently to any changes.

The unit features a **sterile, bright and airy environment with ample natural sunlight** which significantly aids in your child's recovery. Our hospital boasts one of the best **Neonatal Intensive Care Units (NICU)** for newborns. This unit is equipped with cutting-edge facilities including **Level 3 Neonatal Intensive Care** and is staffed by highly trained personnel who care for ill neonates. It is designed for babies needing special attention due to premature birth, illness or health issues. Level 3 NICUs provide the highest level of acute care including surgical repair of complex congenital or acquired conditions. Our facilities offer a comprehensive range of paediatric medical and surgical subspecialties as well as on-site paediatric anesthesiologists.

The NICU is complemented by a **Special Care Baby Unit (SCBU)** for relatively stable babies. We also operate a Neonatal Treatment Program wherein a transport team, including a neonatologist and a NICU-registered nurse, retrieves babies born outside our facility and brings them to our NICU for immediate care.

Our **Paediatric Intensive Care Unit (PICU)** is designed to provide meticulous care to critically ill children. We recognise the stress families face when their child needs admission to the PICU. At Neotia Bhagirathi Woman and Child Care Centre, New Town, our goal is to offer not only the best medical treatment for your child but also the compassion and love they need. Our PICU is staffed around the clock by specialised and trained medical professionals and is equipped with state-of-the-art equipment and technology to ensure the highest quality of care.

NICU

PICU

Paediatric Ward

SCBU
